TECHNICAL SKILLS

Programming	**:**	Java, JavaScript, Shell Scripts, SQL, Design Patterns, Data Structures.
Frameworks	**:**	Spring Boot, Angular, React, Mockito, Java Messaging Service, Microservices.
Tools	**:**	Maven, Gradle, MySQL, Sybase DB, SQL Server, TeamCity, Jenkins Pipeline, Tomcat, Eclipse, Intelij.

WORK EXPERIENCE

Morgan Stanley | 💼 Manager - Senior Software Engineer | 📅 *April, 2022 - Present* | 📍 Mumbai
🌐 Java 8, Angular 14, Spring Boot, REST API, Hibernate, Mockito, MSSQL, Shell Scripts, Microservices, TeamCity

- Working as a **Full Stack** Engineer in an agile squad leading the team, owning responsibility of design, develop and deliver web application using Angular and Java.
- Collaborating with product managers, designers, and QA engineers to ensure high-quality deliverables.
- Achieved 30% reduction in Rest API reponse time by introducing caching mechanism to reduce External API.
- Used **Data Structures** and Problem solving techniques to improve the performance of the system.
- Mentored junior developers and Participated in Conducting interviews for the firm.

JP Morgan Chase | 💼 Associate - Senior Software Engineer | 📅 *May,2019 - April, 2022* | 📍 Mumbai
🌐 Java 8, React JS, Spring Boot, LMAX Disruptor, Google Protobuff, JDBC, Mockito, Sybase, TIBCO EMS, Microservices, Jenkins

- Worked as an Application Engineer resposible for design, developement, delivery and L3 support of the application used globally for processing millions of Market Orders.
- Migrated lagecy Windows Application to a Web Application using *React, Web Sockets* and *Message Brokers* to support live reload.
- Integrated LMAX Disruptor for processing high volume of Market Orders and Executed Trades.
- For microservice-to-microservice data exchange, used **Google Protobuff** to reduce network data transfer and increase consistency.
- Worked on Financial Information Exchange (FIX) Protocol for Market Exchange connectivity.
- Setup and configured CICD Pipeline using **Jenkins** 2.0 based (internal) tool.
- Mentored junior members in the team and Encouraged team to follow TDD using Mockito.

Infibeam Avenues | 💼 Software Engineer | 📅 *July, 2015 - May, 2019* | 📍 Mumbai
🌐 Java 8, Angular 4, Spring Boot, REST API, HTML, CSS, JavaScript, JSF, Hibernate, Mockito, MySQL, Jenkins

- Worked as a Full Stack Engineer on Feature development and Technology Migration.
- Migrated existing Lagecy application from Google Web ToolKit(GWT) to Angular and Spring Boot Application.
- Implemented multi-threaded approach for reducing response time by **3x** in Flights and Hotels Searches.
- Contributed in migrating Standalone application to domain based microservices architecture interconnected by Rest APIs and Message Brokers.
- Innovated a solution for managing frequent static changes in websites by designing and developing an In-House Content Management System (CMS) for B2C websites.

EDUCATIONAL DETAILS

Sardar Patel Institute of Technology, Mumbai, Maharashtra (University of Mumbai)
*Bachelor of Engineering (**Computer**), May 2015*
